

AgriSphere's digital workspace and enterprise management platform connects clients to our customized management programs and offers:

- Documentation management and tracking
- Reporting
- Data dashboarding

Docu-Bin is a short-cut to a digital forms list that contains items from each management program. It is organized with the users in mind for quick and efficient reference and use.

Complimenting Docu-Bin, Vault allows users to search for, sort, and find digital forms and records quickly and easily.

Accessed through the Client Portal, the AgriSphere Training Center allows clients to manage employee training efficiently. The system uses 3-5 minute videos, quizzes, and test that can be completed when and where it is most convenient and effective for them. Management can view reports of employee performance in order to maintain safety across all platforms. The Training Center creates habitual training that becomes integrated into everyday work.

Features

- Corporate Email, Calendar, Tasks, and IM services
- Microsoft Office Online Products
- Document storage and management
 - Content control and version control
- Docu-Bin
- Vault
- Reporting
- Web publishing
- Access Control
- Lists and Inventories
- Adaptive formatting

Advantages

- Expertly generated program content
- Sophisticated organization and navigation
- Controllable access to content
- Easy-to-use document management and control for improved record keeping and reporting
- Creates a company-wide technical platform that allows for more advanced data-driven management
- Increased efficiency and cost savings
- Integration with company email, calendars, and tasks
- World-class customer service
- Cloud-based system reduces up-front capital costs
- Digital format helps with program implementation and onboarding throughout organization
- Program content is easier to use, reference, and apply to every day work activities
- The Client Portal can be a catalyst for transition planning and generational knowledge transfer

User Experience

- Access to AgriSphere’s consulting solutions including All-Safe Safety, agTRACE Food Safety, and agPROACTIVE Maintenance Programs
- Customized home dashboard
- Easy, user-friendly navigation
- Link to Training Center site

Digital Forms

AgriSphere provides procedural and compliance forms that are standardized so that users can input data and information. They allow users to obtain permission to perform an activity, record data in accordance with a regulatory compliance requirement, or to inform other personnel or employees of important information or events. Such information is instantly recorded and cataloged in a database making safety and compliance easier than ever before.

Third-Party Systems Integration

By working with other technology companies within the agriculture industry we hope to enhance the amount of data and decision-making that can be done by users using the Client Portal in their daily work.

Grain facility hazard monitoring equipment manufacturers

Grain facility equipment automation systems manufacturers

Human Resources record keeping/payroll systems

Drone/ weather /geospatial / planting / implement data systems

Security

- Segregation of client’s data
- Clients have unique sign on credentials
- Passwords must be reset on a cyclical basis
- Advanced encryption and tamper monitoring
- Routine data back-up

Configuration and Setup

- Customizable based on program modules
- Requires internet connectivity to access cloud-based services
- User training to ensure understanding of programs provided by AgriSphere
- 24/7/365 support

Updates, Maintenance, and Support

- Periodic version updates to enhance user function, features, advance security and stability, and add new services
- Occasional routine maintenance of sites and services
- Technical and user support provided in the Client Portal’s “How-To” section

Pricing

- One-time setup investment
- Per user per month license fees
- Per platform (Client Portal and Training Center) basic monthly fees
- Per program fee (All-Safe, agTRACE, agPROACTIVE)
- Annual administration and support fees
- All fees are billed annually
