SELECT IS[™]

GSI's top-of-the-line conveyor is loaded with premium features and exclusive options.

Material handling can be complicated. So, we've made it easier than ever for you to get the right tool the job, every time.

Your exact spec

Enjoy limitless custom configurations with the right sizes, layouts, capacities, options and accessories – it's your choice and it's almost all standard. We also offer options for the commercial-grade features you want, such as wear liners and bearings.

Quick detailed quote

Get comprehensive, real-time drawings and a complete spec document with every quote. Engineering approvals and certified drawings are available for all projects and come standard with Select IS.

Seriously reliable performance

We've taken the best design elements and combined them into one platform. You get the superior craftsmanship, commercial-grade dependability and easy maintenance you've come to expect for decades of reliable and profitable service.

Designed for wider application

Gain greater flexibility with a wider selection of features and options.

A higher standard

GSI Select IS comes standard with split sprocket for easier service, higher-end roller bearings and class II drives with class III upgrades. Hot dip galvanize or stainless steel finish, our most durable AR500 liner and S-Path alignment are all exclusive options. GSI Select IS can also be configured as Kleen-Drag or for special commodities, like fertilizer.
